Easton air hockey table manual instructions manual free

The table arrived packed in 1 box and had to weight close to 400 pounds. Never pour anything onto the playfield or the holes may clog. Now when the table is not in use we have it protected and also a useable surface. A followup email had these care instructions: With respect to caring for the table, if you must clean the playfield use a mild detergent applied to a rag and clean with the blower on. We bought this table "blind" after reading the specs, price and availability. The box was completely undamaged and once opened the table was packed very well. They responded right away with a detailed picture and explanation. I searched for several months to find an upper mid range table for my family. The MDF board we wrapped it with craft felt. It consist of a parts list and a picture. The box is lined with MDF boards and also the components are lined with the same material. The electronic scorer is nice and a major selling point for me because it retracts and makes for a smooth surface. Once we saw this it took maybe 45 minutes to connect and only that long because I had to lay on my back, remove the cross brace and screw the blower into place. Attaching the blower, which is IMPORTANT is almost not addressed. The table is AWESOME! The surface is glossy very fast. The inside delivery was well worth the price since it took 4 men to get it down to the basement. Again, apply it to a rag and wipe onto the playfield with the blower on. Playcraft Easton 2 is a great upper mid-range table. The table, delivery and, packing are a 5. Assembly instructions a 3 at best. Skip to content choosing a selection results in a full page refresh. After a couple hours we gave up and sent the manufacture an email. Do not use anything abrasive to clean the playfield. You can apply liquid silicone to speed up the table as it get older. This is what increased the delivery weight significantly. The enclosed assembly direction are pathetic. The timed play is great and can be set for 15, 10 or, 5 minute play. To maintain the surface for the long run we kept the styrofoam packing and one of the MDF boards. That's it.
